

UNIVERSITY OF KYRENIA
FACULTY OF HEALTH SCIENCES
DEPARTMENT OF NURSING (ENGLISH PROGRAM)
COURSE CONTENTS

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
AIT103	History I for International Students	(2,0,0)	2	2	Compulsory Course
<p>Origins and rise of Ottoman Empire, Ottoman Administrative System, Ottoman Society, Law and Education, Revolts and Reform Attempts in Ottoman Empire, Reforms Through 19th Century, Military and Administrative Reforms, Reign of Abdülhamid II, Young Ottomans and Ottomanism, First Constitutional Era, Second Constitutional Era, Political Struggle for Power, The Ideological Debates: 1913-1918, Ottoman Empire and First World War I.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
CMP121	Information Technologies	(3,0,0)	3	3	Compulsory Course
<p>The course contains covers the basic concepts of information technologies, software and hardware, operating systems in general, word processing programs, spreadsheet programs, data presentation, internet use in education, the effects of information technologies on social structure and its place in education, information systems security and related ethical issues.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
ENG101	English I	(3,0,0)	3	4	Compulsory Course
<p>Talking about biographies, asking and answering about general knowledge, talking about past events, talking about technology in the future, asking for permission/making a request, formal phone conversations, informal phone conversations, making an appointment, talking about products, checking understanding/ asking for clarification.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
FHS103	Anatomy	(3,0,2)	4	6	Compulsory Course
<p>The course defines the systems in the human body and the locations and functions of the organs and formations belonging to these systems. In this course, it is aimed to teach human anatomy in relation to</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
body systems and functions. The course content includes introduction to anatomy and basic concepts, general introduction of the human body, musculoskeletal system, nervous system, circulatory system, respiratory system, endocrine system, digestive system, immune system, urinary system, reproductive system.					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
FHS109	Physiology	(3,0,0)	3	5	Compulsory Course
The course includes cell physiology, nerve, muscle, blood physiology, central nervous system physiology and physiology of systems such as respiration and circulation. The aim of the course is to study the parts of the organism (cell-tissue-organ-system), the communication between these parts and the relationship of the organism with the environment as a whole; to describe the physical and chemical factors that provide development from the beginning of life and to explain various features and mechanisms that maintain life.					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
FHS113	Biochemistry	(2,0,0)	2	3	Compulsory Course
Based on the fundamentals of basic chemistry, the course includes the structure and functions of carbohydrates, proteins, enzymes, lipids and nucleic acids, which are the basic principles of biochemistry. The aim of this course is to provide basic biochemistry information to be used in the field of Health Sciences and to integrate this information with the information in the related field.					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
FHS115	Histology	(2,0,0)	2	3	Compulsory Course
The branch of science that studies tissues is called histology. In the course, the histological structure of cells and basic tissues in the human body, the human anatomy and physiology of these tissues are examined. The student learns the histological structure of cells and basic tissues in the human body, and the relationship of these tissues with human anatomy and physiology.					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR107	Introduction to University and Nursing	(2,0,0)	2	3	Compulsory Course

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
<p>Designed to introduce and transition the freshman and transfer nursing student to the language of nursing, critical thinking, the essential academic skills for incoming students and the interpersonal skills required for success in nursing school and the nursing profession. Selected concepts and processes for professional nursing will be included in the course, including an introduction to nursing's theoretical, philosophical, ethical, and legal dimensions.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
YIT103	Turkish I for International Students	(2,0,0)	2	2	Compulsory Course
<p>The Turkish Alphabet and how Phonetics is in Turkish Alphabet, how nouns are made plural in Turkish, how to form yes-no questions, how to form sentences with “there is/there are, possessives in Turkish, how to use personal pronouns, numbers and asking questions related to numbers, how to use noun states in Turkish, where and how to use present continuous tense and simple present tense.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
AIT104	History II for International Students	(2,0,0)	2	2	Compulsory Course
<p>Abolition of the Sultanate; Proclamation of the Republic; Taking the Election Decision in the First Parliament; Establishment of the People's Party; Ankara Becoming the Capital, Proclamation of the Republic and Reactions; Abolition of the Caliphate (The Emergence of the Problem of the Caliphate and the Events Preparing the Abolition of the Caliphate), Progressive Republican Party and Sheikh Said Rebellion; Law of Takrir-i Sukun; Closing the Progressive Republican Party; İzmir Assassination Attempt), Free Republican Party and Menemen Incident; An Overview of Atatürk-Inönü Separation, Revolutions and Their Goals; Revolutions in Law; 1924 Organization-ı Esasiye Law; Adoption of the Turkish Civil Code; Adoption of Other Basic Laws; Revolutions in Women's Rights, Education and Culture; The Law of Unification of Education; Adoption of the New Turkish Alphabet; New Understanding of History and Language; From Darülfünun to Istanbul University; Fine Arts, Developments in Economics; Late Ottoman Economy; Turkish Economy Congress and Its Results; Economic Activities in the First Years of the Republic; Transition to the Practice of Statism, Revolutions Made in Social Life (Modernization in Clothing: The Law on Wearing Hats; Closure of Lodges, Zawiyas and Tombs, Adoption of International Time, Calendar, Numbers, Measurements and Week Holidays; Adoption of the Law on Surnames; Developments), Turkey's Foreign Policy in Atatürk Era; Years</p>

					1919-1923; Years 1923-1930, Going to the Second World War and Turkish Foreign Policy 1931-1939, Principles of Atatürk; General Overview of Atatürk's Principles; Republicanism, Nationalism, Populism, Statism, Secularism, Revolutionism, İsmet İnönü Period (1938-1950); Domestic Policy During the Second World War; Establishment of the Democratic Party, Democratic Party Period (1950-1960); May 27 Military Intervention and National Unity Committee.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
ENG102	English II	(3,0,0)	3	4	Compulsory Course
					Health matters, restaurant problems-complaints and responses, talking about computer problems, reporting the news and the weather, product problems- complaints at the store, talking about the future possibilities, health problems and herbs, job qualifications and working conditions.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
FHS110	Pathology	(2,0,0)	2	4	Compulsory Course
					Pathology means the science of disease. Explains the causes of diseases and the mechanisms of occurrence of diseases to those who will work in the field of health. The aim of the course is to describe abnormal structural and morphological changes in cells and tissues.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
FHS112	Nutrition	(2,0,0)	2	3	Compulsory Course
					In the course content, the importance of carbohydrates, proteins, lipids, vitamins and minerals in healthy nutrition, the chemical structure, properties, classification, functions of carbohydrates, proteins, lipids, vitamins and minerals, sources of carbohydrates, proteins, lipids, vitamins and minerals, daily intake recommendations, excessive intake status, energy metabolism, the importance of water and electrolytes in body functioning, nutrition in special cases, the importance of nutrients in food groups in healthy nutrition will be evaluated.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
FHS128	Microbiology Parasitology	(2,0,0)	2	4	Compulsory Course

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
	<p>Microorganisms are important creatures in human life. For this reason, in the microbiology course, the classification of bacteria, viruses, fungi and parasites that cause disease and the normal flora, which is a barrier to infectious agents, will be discussed. Sterilization and disinfection, in which methods of purification from living organisms that cause disease are explained, are among the important topics of the course as well as therapeutic antibiotherapy. This course aims to teach basic and clinical microbiology-related topics, causative microorganisms, to associate basic information with clinical information in the approach to medical diseases they cause, and to provide training on microbiological tests for laboratory diagnosis of these agents. It gives general information about patients and diseases that may be encountered in professional life and clinics within the scope of medical microbiology.</p>				

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR110	History of Nursing and Professionalism	(4,0,0)	4	6	Compulsory Course
	<p>This course is a course that describes the historical development of nursing and nursing education, its basic concepts and nursing as a professional profession. In this course, the student; Understands the historical development process of nursing, the relationship between the four basic concepts of nursing, human, health and environment with nursing, the framework, characteristics, theory and philosophy of nursing. Course, Nursing and nursing concepts, Historical development of nursing and nursing education in the world, Turkey and Cyprus, ethical and legal situation, Four basic concepts of nursing: human, environment, health/illness, nurse and nursing care concept, Nursing and professionalism : professionalism criteria, professional values, professional socialization, the place of the nurse in the health team, Nursing theories and models, Nursing theorists: Florence Nightingale, Cultural approach in nursing care: “transcultural nursing”.</p>				

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR112	Pharmacology in Nursing	(2,0,0)	2	4	Compulsory Course
	<p>Pharmacology is the science that examines drugs, the mechanisms by which drugs affect biological responses, the pharmacodynamic and pharmacokinetic properties of drugs acting in organ systems, their side effects, toxic effects and drug-drug interactions. The aim of this course is for students to; To enable students to learn the basic concepts of pharmacology, pharmacokinetic and pharmacodynamic properties of drugs, their effects, drug interactions and effects on organ systems with a systematic approach.</p>				

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
YIT104	Turkish II for International Students	(2,0,0)	2	2	Compulsory Course

The Turkish Alphabet and how Phonetics is in Turkish Alphabet, how nouns are made plural in Turkish, how to form yes-no questions, how to form sentences with “there is/there are, possessives in Turkish, how to use personal pronouns, numbers and asking questions related to numbers, how to use noun states in Turkish, where and how to use present continuous tense and simple present tense.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
FHS102	Drama and Education	(2,0,0)	2	2	Elective Course

Course, communication-interaction studies, theoretical study (basic concepts in creative drama: creativity, drama, creative drama, play and theater pedagogy, communication-interaction, role playing, improvisation, action, dramatic play, children's theater etc.), trust-adaptation studies include theoretical work (stages and elements of creative drama), role playing and introduction to improvisation, role playing and improvisation theoretical work (history of creative drama), literary genres and the relationship of creative drama.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
FHS104	Health Protection and Promotion	(2,0,0)	2	2	Elective Course

The course covers health concepts, dimensions of health, conditions and risk factors affecting health, health protection and promotion and the roles of the nurse, healthy lifestyle behaviors, quality of life, holistic health, theories and models related to health and health promotion, national health promotion. and international organizations, health promotion policies and strategies, the development of health behaviors in the community, and health education.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
SFT206	Medical English	(2,0,0)	2	2	Elective Course

This course is designed to help medical students develop listening, speaking, reading and vocabulary skills in English.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR203	Nursing Ethics	(2,0,0)	2	3	Compulsory Course

The course includes nursing ethical concepts, theories, principles, declarations, nursing laws, regulations and ethical problems encountered in nursing. In this course, it is aimed that the student comprehend the basic information about ethics, gain ethical sensitivity, analyze the problems encountered while providing health care services from an ethical perspective and gain the ability to make ethical decisions.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR205	Fundamentals of Nursing	(5,6,4)	10	16	Compulsory Course

The Fundamentals of Nursing course deals with people and society in their environment with a holistic approach and aims to form the basis for other nursing courses by teaching the principles and techniques of nursing. The course includes basic nursing care and practices. In this context, basic concepts, nursing and professionalization process, healthy hospital environment, infection control, vital signs, drug administration, fluid electrolyte balance, drug administration, blood transfusion, respiratory need and nursing care, healthy and sick individual's need to know movement, warm and cold applications, individual hygiene and nursing care, communication with difficult patients, the need for excretion of healthy and sick individuals (urinary excretion, bowel evacuation), nutrition, metabolism and nursing care, perioperative patient care, wound care, critical thinking and nursing process, sleep and nursing interventions, the concept of death and loss, and nursing interventions.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR207	Communication Skills in Nursing	(2,0,0)	2	4	Compulsory Course

It is a planned course for the development of communication skills, which is a part of the nursing profession. At the end of this course, the student; The concept of communication, the importance of communication in human relations and the factors affecting communication, the basic characteristics and needs of human beings, the cognitive aspect of human and affective process, self, body image, self-esteem, identity concept, self-recognition and awareness, human behavior characteristics, group dynamics and communication in groups. It is aimed to comprehend and apply therapeutic communication and empathy, anger management, conflict and conflict management strategies in interpersonal relationships, communication in special situations and the use of all this information in the field of nursing.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR219	Health Assessment	(2,0,0)	2	4	Compulsory Course
<p>The course includes evaluation of body systems. The aim of this course is to examine all body systems, determine normal / abnormal subjective and objective findings, activity, sleep, rest, mental health, evaluation of children and the elderly, health promotion and recording health-related data, and necessary skills related to ethnic and cultural evaluation.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
FHS205	English for Health Sciences	(2,0,0)	2	3	Elective Course
<p>The course is designed to help students improve their English listening, speaking, reading and vocabulary skills. The course aims to give students the chance to learn specific vocabulary and expressions, activate passive vocabulary, learn the English pronunciation of medical terms, and increase fluency and confidence in using English in professional contexts.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR211	Leadership in Nursing	(2,0,0)	2	3	Elective Course
<p>The course focuses on leadership in nursing and key concepts related to leadership. The content of the course includes the concept and history of leadership, theories, leadership styles, leadership and gender, leadership and effective use of power, visionary leadership, positioning in nursing, taking action for leadership, leadership and participation in politics.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR208	Medical Nursing	(5,6,0)	8	14	Compulsory Course
<p>Definition and characteristics of internal medicine nursing, nursing care in chronic diseases, nursing care in nervous system diseases, nursing care in digestive system diseases, nursing care in respiratory system diseases, nursing care in kidney diseases, nursing care in cardiovascular system diseases, nursing care in joint connective tissue diseases, metabolic diseases and nursing care, nursing care in endocrine system diseases, nursing care in blood diseases, cancer and nursing care, nursing care in immune system diseases, skin diseases and nursing care.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR210	Surgical Nursing	(5,6,0)	8	14	Compulsory Course
<p>This course includes theoretical knowledge and practices, including the holistic approach of the surgical patient and accordingly pre-, intra-, post-operative and home care. The course covers the definition of surgery, the types of solutions, its effects on the patient, risk factors, perioperative care, wound healing and nursing care, control of hospital infections, pain and nursing care in surgery, shock in surgery, fluid electrolyte and acid-base balance in surgery, digestive system. surgical diseases and nursing, kidney, urinary tract and male reproductive organs surgical diseases and nursing care, surgical diseases and nursing of the nervous system, surgical diseases and nursing of the respiratory system, surgical diseases and nursing of the cardiovascular system, transplantation and nursing care, breast diseases surgery and nursing, orthopedic diseases and nursing, surgical diseases and nursing of the endocrine system, nursing care of patients undergoing plastic and reconstructive surgery, perioperative care in geriatric patients, ophthalmology nursing, ear-nose-throat diseases and nursing, burn treatment and nursing care, homeostasis.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR214	Education in Nursing	(2,0,0)	2	2	Compulsory Course
<p>This course includes the basic concepts of health education and training, the characteristics of adult education, educational methods and techniques, the use of audio-visual education tools and health education applications. In this course, students; knows and applies the education methods necessary for the health education they will give to the individual and society.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR305	Obstetrics and Gynecology Nursing	(5,6,0)	8	14	Compulsory Course
<p>The course focuses on nursing care in women's health and diseases. The course covers the concepts and theories of women's health, ethical and legal aspects of women's health, sexual health, reproductive health, anatomy and physiology of reproductive organs and the formation of pregnancy, psychological and physiological changes in pregnancy, early and late risky pregnancies, labor and care, postpartum and care, care in risky labor and delivery, family planning and care in infertility, life cycle and menopause, diagnosis and treatment methods in gynecology, structural disorders of reproductive organs and nursing care, genital tract and sexually transmitted infections, reproductive organs good and bad includes benign tumors and nursing care.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR307	Child Health and Diseases Nursing	(5,6,0)	8	14	Compulsory Course

This course, within the framework of holistic nursing approach, normal growth and development characteristics of the child from birth to the end of adolescence, child-family and society interaction, child health and affecting factors, health deviations, the role and functions of nurses in the care of healthy and health-related children, current approaches. and care models provide information on evidence-based care practices and provide skills in practices in related fields. Course, The state of child health in the world and in Turkey, Growth and development, Child and his family in developmental periods, Adaptation of newborn to extrauterine life, Characteristics and care of normal newborn, Some common problems in newborns, Nursing evaluation of child and family, Immunization, Communication with the child, Respiratory Children with system problems, Children with GI problems, Fluid electrolyte-acid-base balance in infants and children, Drug administration in children, Child with endocrine problem, Child with genito-urinary system problem, Child with hematological oncological problem, Neurological diseases and their management, Circulatory system The child with a problem includes special topics in neonatal nursing.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
FHS303	Health Sciences English I	(2,0,0)	2	2	Elective Course

The course is designed to help students improve their English listening, speaking, reading and vocabulary skills. The course aims to give students the chance to learn specific vocabulary and expressions, activate passive vocabulary, learn the English pronunciation of medical terms, and increase fluency and confidence in using English in professional contexts.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR311	Complementary Treatment and Care	(2,0,0)	2	2	Elective Course

This course is a course that focuses on providing the student with knowledge and skills on the examination of methods used together with modern medicine in the protection and promotion of the health of the individual, family and society. By defining complementary therapies, the role of the nurse in complementary methods aims to provide the student with knowledge and skills about complementary

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
methods such as therapeutic touch, massage aromatherapy, acupressure, acupuncture, shiatsu, reflexology and music.					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR313	Diabetes Nursing	(2,0,0)	2	2	Elective Course
The aim of this course is to provide students with knowledge and skills on the management and education of individuals with diabetes, and to provide information on national and international progress in diabetes nursing. Course content; Definition, epidemiology, classification and diagnostic criteria of diabetes. Roles and responsibilities of the diabetes nurse. Evaluation of individuals with diabetes, principles of treatment in diabetes. Medical nutrition therapy in diabetes. Diabetes and exercise. Oral antidiabetic drug therapy. Insulin therapy. Diabetes and exercise. Acute complications of diabetes. Chronic complications of diabetes, foot care in diabetes. Diseases associated with diabetes and its management. Psychosocial problems and nursing approaches in diabetes.					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR317	Geriatric Nursing	(2,0,0)	2	2	Elective Course
The aim of the course is to provide the necessary knowledge and skills about the aging process and the biological, psychological and social changes that occur in this process and its reflections on nursing care. Course, basic principles of geriatrics, definition of geriatrics. Elderly population, theories of aging. Approach to elderly patients, general condition assessment. Physiological changes in old age. Quality of life in geriatrics. Nutrition and fluid balance in the geriatric patient. Communication with geriatric patients. Geriatric diseases. Prevention of home accidents and falls. Medication use. Psychosocial needs of geriatric diseases. It includes geriatric rehabilitation topics.					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR319	Palliative Care Nursing	(2,0,0)	2	2	Elective Course
Recognition of physiological, psychosocial and spiritual problems in the patient and his family who need palliative care in the palliative care process, and the care process, to gain the necessary knowledge and skills in the application of effective coping methods with the bereavement period. Course, Palliative care,					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
<p>hospice and supportive care. Palliative care team. Holistic approach in palliative care: symptom management. Holistic approach in palliative care: psychological care. Holistic approach in palliative care: spiritual care. Problems in the care of palliative care patients, caregiver family burden. Support for mourning lost. Includes palliative care ethics and legal issues.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR312	Mental Health and Diseases Nursing	(5,6,0)	8	14	Compulsory Course
<p>This course teaches to gain the skills of preventive, curative and rehabilitative nursing approaches for physical, social and mental problems and to improve the coping powers of the individual by taking into account the conceptual knowledge of the protection, development and improvement of mental health and the variables that affect mental health. Course, Mental health and illness concept. Historical development and roles and responsibilities of psychiatric nursing. Community mental health nursing, Mental developmental stages and childhood mental health problems. Psychosexual, psychosocial and mental development theories. According to the psychodynamic approach, the psychic structure and the ego's defense mechanisms. The therapeutic environment and therapeutic communication. Consultation liaison psychiatric nursing. Emotional responses to physical illness and its approach. Evaluation of mental status and symptoms and disorders in psychiatric diseases. Stress, anxiety and coping. Anxiety disorders and nursing approach. Personality disorders and nursing approach. Organic mental disorders and nursing approach. Dissociative disorders and nursing approach. Somatoform disorders and nursing approach. Schizophrenia and other psychotic disorders and nursing approach. Sleep disorders and nursing approach. Sexual health, sexual dysfunctions and nursing approach. Eating disorders and nursing approach. The concept of crisis and crisis intervention. Emergency psychiatric conditions and nursing approaches. Mood disorders and nursing approach. Psychoactive substance use disorder and nursing approach. The treatments used in the field of mental health and psychiatry and the role of the psychiatric nurse. It includes legal and ethical issues in psychiatric nursing.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective

<p>First aid, disaster and transportation principles will be explained to the nursing student for the sick and injured people they will encounter in their professional life.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
FHS401	Biostatistics	(2,0,0)	2	2	Compulsory Course
<p>Biostatistics is a branch of science that includes the applications of mathematical-statistical techniques in medicine and health sciences, makes adaptations specific to this field, and produces new techniques. It is used extensively in the planning of all health-related research, statistical evaluation and interpretation of findings. Biostatistics course provides basic information about these techniques.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR403	Research in Nursing	(2,0,0)	2	3	Compulsory Course
<p>It includes the concepts of knowledge, science, research and technology, components of scientific research, time management and planning, literature review, ethical principles, scientific methods in research (qualitative and quantitative), research project and report preparation, laboratory safety. It covers the questions to be asked in the scientific research process, what the qualitative and quantitative approaches to finding answers are and how to use them.</p>					

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR407 NUR408	Fundamentals of Nursing Practice	(2,20,0)	12	23	Elective Course

This course includes basic nursing care and practices. Care concept. Daily living activities model. Heart failure. Digestive system applications. Ensuring tissue integrity. Pressure sores. Chronic renal failure. Excretory system applications. Stoma care. Parenteral drug administrations. blood transfusion. Oxygen therapy. Urinary system applications. Professional values in nursing.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR409 NUR410	Internal Medicine Nursing Practice	(2,20,0)	12	23	Elective Course

This course includes concepts, principles of care and clinical studies related to the prevention, treatment, nursing care and rehabilitation of internal diseases.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR411 NUR412	Surgical Diseases Nursing Practice	(2,20,0)	12	23	Elective Course

In line with the understanding of preventive health services, this course provides knowledge and skills about the basic principles of surgery, the diseases of the systems that require surgical intervention, and nursing care with a holistic approach. This course provides students with current theoretical, evidence-based and applied knowledge specific to the field of surgical nursing; It aims to provide surgical patients with the ability to provide nursing care with a holistic understanding and a systematic approach.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR413 NUR414	Obstetrics and Gynecology Nursing Practice	(2,20,0)	12	23	Elective Course

This course is a whole consisting of practical and theoretical courses that examine the physical problems of women in pregnancy, childbirth, postpartum period and gynecological diseases in all life stages from healthy human insemination to old age. It includes the ability to protect the health of women, fetuses and newborns, to identify and care for risky pregnant women and to apply nursing approaches, to evaluate normal and deviating situations in labor, to think critically and to apply birth control methods.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR415	Child Health and Diseases	(2,20,0)	12	23	Elective Course
NUR416	Nursing Practice				

At the end of this course, in line with the philosophy of holistic and family-centered-atraumatic care, the student will be able to integrate the basic knowledge and principles of child health with the roles and functions of pediatric nursing, to address the healthy/sick child and his family with a holistic approach, to develop, protect and maintain the health of the child and his family. learns nursing roles and functions related to

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR417	Mental Health and Diseases	(2,20,0)	12	23	Elective Course
NUR418	Nursing Practice				

This course teaches to develop the skills of preventive, curative and rehabilitative nursing approaches and coping powers of the individual by taking into account the conceptual knowledge of the protection, development and improvement of mental health and the variables that affect mental health. At the end of the course, the student will be able to define and apply the concept of human and mental health, the dynamics affecting human mental health, and the roles of psychiatric nurses in the protection of mental health. Will be able to discuss the concepts of mental health, illness and protection by customizing them to the field of psychiatric nursing. Will be able to formulate the nursing process on sample cases in line with the roles of the psychiatric nurse in order to protect mental health. He will have the responsibility of transferring the nursing process to the field of practice. He/she will apply the nursing process by evaluating healthy individuals and families in the society, and the patient in general clinics and psychiatry clinics with a holistic perspective.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR419	Public Health Nursing Practice	(2,20,0)	12	23	Elective Course
NUR420					

This course examines the nursing process for the protection and improvement of the physical, mental and social health of the individual, family and society, and for reintegrating them into society and for adverse conditions affecting health.

Course Code	Course Name	(T,A,L)	Credit	ECTS	Compulsory/Elective
NUR427	Social Responsibility Practices in Nursing	(2,0,0)	2	2	Elective Course
